Offered by

Sustainable Greenfield Implementation Committee (SGIC)

Speakers include

Carole Collins

Energy & Sustainability Director, Town of Greenfield

Beth Giannini

Senior Transportation Planner II

Franklin Regional Council of Governments (FRCOG)

One of the Master Plan’s goals is to make Greenfield more vibrant and inclusive for everyone by offering more transportation options, while at the same time reducing downtown air pollution and making our streets more beautiful,” said Carole Collins, chair of SGIC and Greenfield’s Energy and Sustainability Director. “This nationwide movement helps communities make streets safer and more inviting, especially for walkers, bikers, and wheelchair and public transit users, so that streets are not just for cars, but for everyone.”
