Acknowledgements

Thank you to all the contributing persons and parties to this ADA self-evaluation and transition plan. Without the tireless work of the City of Greenfield, its City commissions, and its residents and other stakeholders, this plan would have not been a true comprehensive ADA self-evaluation and transition plan.

Sustainable Greenfield Implementation Committee
Nancy Hazard, Chair

This Greenfield Self-Evaluation and Transition Plan was conducted and compiled by the Berkshire Regional Planning Commission, with input and assistance from City staff, the Greenfield Commission on Disability Access, and the Greenfield Council on Aging. Funding support for the project was provided by the Massachusetts Office on Disability.
Executive Summary

In early 2018, the City of Greenfield was awarded a grant from the Massachusetts Office on Disability. The $40,000 grant was awarded to update their ADA Self-Evaluation and Transition Plan (here forth “The Plan”). The City last updated their plan in 2004, nearly 14 years ago. Since then, ADA design guidelines have changed, and case law has increased the importance of creating truly accessible localities. While the City of Greenfield has worked diligently to implement their previous plan, the City is committed to taking the next step to be a model for ADA accessible cities. The plan gave the City a chance to re-evaluate City-owned properties including buildings, public rights-of-way, parking lots, public parks, and schools. It also provided guidance on which programs and services available to the public were providing equal access. Some properties and departments did not exist in the last plan, including the high school and the Community Center which were both built within the last five years.

The City of Greenfield is a unique City in western Massachusetts when it comes to its commitment and need to accommodate residents with disabilities and mobility concerns. According the American Community Survey for the years of 2012 -2016, 15.5% of all residents in the City are reported to have a disability. This includes but is not limited to hearing, vision, cognitive, and ambulatory disabilities. This especially effects the minority population, as between one quarter and one third of Black residents have a disability. Other populations who are likely to need assistance and would benefit from a more ADA compliant community include veterans and older residents. The City of Greenfield has a large percentage of these types of residents as well, 8.6% and 16.5% respectively. During the planning of the self-evaluation and transition plan, the City and BRPC reached out to these communities through the City’s Commission on Disability Access, the Greenfield Council on Aging, and the Sustainable Greenfield Committee.

In 2010, a civil rights complaint alerted the City to new concerns around ADA accessibility. Many aspects of the Four Corners School were not ADA compliant including exterior accessible routes, restrooms, classrooms, nurse’s suites, the library, and the administrative office. Greenfield quickly remedied these violations and remains committed to ADA compliance throughout all municipal owned and controlled space.

In February 2018, the City of Greenfield hired consultants Berkshire Regional Planning Commission (BRPC) to update the self-evaluation and transition plan. BRPC’s work included evaluating City department policies, access to public meetings, and access to services in City-owned properties. To ensure compliance in buildings, BRPC hired a sub-consultant. Some areas were evaluated in the last five years by the City including parking lots, parks, and sidewalks. BRPC staff and the subconsultant worked between March and May to complete the required evaluations. Many city-owned and controlled assets had not been evaluated since the 1990’s so it was important to collect new data to evaluate accessibility.

Included in the self-evaluation were the policies, training materials, and accommodations in place to comply with the American for Disabilities Act (ADA) for departments that provide services. The City policy includes the Equal Employment Opportunity (EEO) Policy which outlines employment procedures by the City when hiring people with
disabilities while the Notice of Non-Discrimination outlines the policy in place to allow equal access to services and programs for disabled persons. In addition, the grievance procedure needs to be edited to reflect a new ADA coordinator. Finally, it is important for departments to have training materials on how to accommodate and communicate with disabled residents effectively. It was determined these were not provided by the City in the self-evaluation.

The evaluations were used to create a transition plan that outlined all the steps necessary to make City-owned areas ADA compliant. These City-owned areas included buildings, public rights of way, parks, and parking lots. This included listing what needed to be altered, removed, fixed, etc. and setting priorities, a schedule, and a cost estimate for making those changes. Some assets, like sidewalks and curb ramps, have a consistent price to replace, while buildings vary depending on which aspects of the building make it inaccessible to persons with disabilities. In addition, sidewalks and curb ramps also are always being replaced, so it was important to determine which ones needed to be replaced first to efficiently use city funds. Building repairs are based on a five-year implementation plan, with smaller upgrades completed faster depending on the services provided by the building, and how severe the accessibility challenges were.

Some of the recurrent issues with buildings and schools included improper signage including signs that were at the wrong height, did not include tactile lettering in cases where handicap restrooms, elevators, and entrances existed. For this reason, nearly half of buildings ranged from only moderately accessible to completely inaccessible. The two buildings that were completely accessible were the high school and Community Center, the newest public buildings in Greenfield. While their newly constructed buildings are accessible, it is necessary that Greenfield take a specific focus on retrofitting their existing buildings when feasible to make them accessible.

The curb ramps and sidewalks in Greenfield range in condition from new and completely accessible to dangerous and deteriorating. Since the sidewalk evaluation in 2016, work has already been completed to make sidewalks safer and more accessible. For example, the sidewalk was replaced along School Street adjacent to the new Community Center. However, there are some streets that are desperately in need of sidewalk and curb replacement. A poignant example is around 75 Mill Street up to the corner of Legion Street. 75 Wells Street is home to many residents with disabilities, making it a vulnerable population area that the City needs to pay attention to. The sidewalks along Wells Street are brick which has raised over time and poses a serious risk to pedestrians. Near Legion Ave, the curbs and sidewalks are deteriorating and one of the crosswalks on that corner is not an accessible route to the adjoining sidewalk. Other areas of concern include the north end of Federal Street and near the intersection of Main Street and Federal Street.

While there are no specific design requirements by ADA or the Massachusetts Architectural Access Board for many public right of ways, best practices dictate that at least 4% of all on-street parking spaces are required to be accessible. Compared to the total 476 on-street city-owned parking spaces in downtown Greenfield, only nine (2%) of them are accessible. In addition, there are no van-accessible spaces, of which there should be at least one. There are also concerns with making sure the signage at
accessible parking spaces and the accessible route onto the sidewalk are compliant. Sidewalks and curb ramps were evaluated on condition. Sidewalks and curb ramps in worse condition were given higher preference for replacement. Sidewalks and curb ramps in the downtown area and in close proximity to schools within the city were also given higher preference for replacement.

It was also discovered during the course of the transition plan update that the parks and recreation areas had not been surveyed since 1999. Therefore, a new complete accessibility survey was done for parks and recreation areas in Greenfield.

Parking lots were also evaluated for condition in 2013 by the City. Several of these lots were evaluated for the building surveys for this plan, and the rest were evaluated for the correct number of accessible parking spaces for the plan. For the most part, the City has been diligent in providing the correct number of accessible spaces in city-owned lots. However, it is concerning that many lots do not have proper accessibility to the rights-of-way including sidewalks and building entrances.

The City of Greenfield has seen positive development over the past several years including a new high school, a new Community Center, and soon, a new library and parking garage. Development of its civic core is growing, and with growth, there is a responsibility to make sure nobody is left behind. With a stagnant population of people, and a growing percentage of the population being elderly, residents with disabilities and veterans, Greenfield is working hard to ensure that all people can enjoy the newer, better Greenfield.

The draft of the plan was completed in June 2018 and will continue to guide the City’s implementation of their ADA compliance goals for approximately five years.
Introduction

The Americans with Disabilities Act (ADA) of 1990 is a civil rights statute that prohibits discrimination against people who have disabilities. There are five separate Titles (sections) of the ADA relating to various aspects of potential discrimination. Title II of the ADA specifically addresses the subject of making public services and public transportation accessible to those with disabilities. Under the terms of the ADA, designing and constructing facilities for public use that are not accessible by people with disabilities constitutes discrimination.

Title II of the ADA mandates that state and local governments or public entities ensure that persons with disabilities can fully participate in all services, programs or activities. They are required to reasonably modify their policies, practices and procedures to prevent discrimination. The City of Greenfield falls under Title II criteria and is obligated by federal and state law to uphold the regulations to protect the rights of disabled individuals.

In order to meet its obligations under Title II of the ADA, the City of Greenfield is updating its ADA Self-Evaluation and Transition Plan completed in 2004. The plan details the City’s policies and procedures for compliance with all aspects of the ADA and other relevant state and federal statutes applied to protecting the rights of disabled people. It applies to City staff; governs City infrastructure such as buildings, schools, parks, parking lots, and provides a framework for continuous upgrades to the public right of way including sidewalks, curb cuts, and on-street parking.

This plan is important to the continued services that residents, workers, and visitors alike enjoy. The City unequivocally believes that without full access to programs, services, activities, and public rights-of-way, the City is failing in its obligations not only to those with disabilities, but all members of its community who value human rights, diversity of experience, and equal opportunity.

Buddy Baseball in Action. Buddy Baseball is a program for girls and boys with disabilities. Each player has a peer Buddy to assist with skills the player cannot perform. The program is designed to teach and practice the basic skills of softball and baseball.
Federal, State, and Local Requirements

Architectural Barriers Act of 1968 (ABA)
The Architectural Barriers Act (ABA) requires that buildings and facilities that are designed, constructed, or altered with Federal funds, or leased by a Federal agency, comply with Federal standards for physical accessibility. ABA requirements are limited to architectural standards in new and altered buildings and in newly leased facilities.

Section 504 of The Rehabilitation Act of 1973
Section 504 states that "no qualified individual with a disability in the United States shall be excluded from, denied the benefits of, or be subjected to discrimination under" any program or activity that either receives Federal financial assistance or is conducted by any Executive agency or the United States Postal Service.

Each Federal agency has its own set of section 504 regulations that apply to its own programs. Agencies that provide Federal financial assistance also have section 504 regulations covering entities that receive Federal aid. Requirements common to these regulations include reasonable accommodation for employees with disabilities; program accessibility; effective communication with people who have hearing or vision disabilities; and accessible new construction and alterations.
The Americans with Disabilities Act of 1990 (ADA)

The ADA prohibits discrimination on the basis of disability in employment, State and local government, public accommodations, commercial facilities, transportation, and telecommunications. It also applies to the United States Congress. There are four titles that outline ADA requirements for employment, state and local government activities including public transportation, public accommodations including historic properties, and telecommunications access.

Title II, one of five separate titles of the ADA, applies specifically to “public entities” and the programs, services, and activities they provide. This title outlines the requirements for the self-evaluation, Transition Plan and appointing an ADA coordinator.

In 1992, the U.S. Department of Justice issued 28 Code of Federal Regulations (CFR) Part 35, Nondiscrimination on the Basis of Disability in State and Local Governmental Services, to implement Subtitle A of Title II. In particular, this regulation extended the prohibition of discrimination in federally assisted programs already established by Section 504 of the Rehabilitation Act to all activities of state and local governments, including those that do not receive federal financial assistance.

The 2010 ADA Standards for Accessible Design (ADA Standards)

The ADA Standards outline the requirements necessary to make a building or other facility physically accessible to people with disabilities. The Standards are a comprehensive guide that identifies what features will need to be accessible and list the specifications required to make them compliant with the ADA.

Accessibility and Discrimination

Accessibility plays a significant role in the inclusion of people with disabilities. The first step toward fulfilling the rights of people with disabilities is creating an accessible, barrier-free environment. Regulations require that structural barriers be removed in public areas of existing facilities when such removal is readily achievable. Barriers typically found in public areas include: routes of travel requiring the use of stairs, non-ADA compliant ramps, door widths that cannot accommodate the passage of a wheelchair, and the location of door handles that are too high.

Discrimination against individuals with disabilities occurs when a person is perceived differently, treated differently, and struggles to gain acceptance at a level experienced by their non-disabled peers. Often, physical barriers encountered by people with disabilities can be perceived as discrimination because they exclude that individual from reaching their desired destination or performing a specific task or action. According to the ADA, all State and local governments are required to follow specific architectural standards in either the new construction or the alteration of existing buildings unless the corrective actions would result in undue financial or administrative burdens. To avoid discriminating against those with disabilities, public entities are required to make reasonable modifications. These modifications will provide equality of opportunity, but the city cannot guarantee equality of results.
Program Accessibility

Title II requires local governmental agencies to ensure that all of their programs, services, and activities, when viewed in their entirety, are accessible to persons with disabilities. Program access is intended to remove physical barriers to the local governmental agency services, programs and activities, but it generally does not require that the local governmental agency make each facility, or each part of any given facility, accessible. For example, every restroom in a given facility does not need to be made accessible. However, signage directing persons with disabilities to the accessible features and spaces within that given facility must be provided.

Program accessibility may be achieved through a variety of ways. Local governmental agencies may choose to make structural changes or pursue alternatives to structural changes to achieve access. For example, the local governmental agency can move public meetings to accessible buildings and relocate services for individuals with disabilities to accessible levels or parts of a building. It should be noted that when choosing between possible methods of program accessibility, the local governmental agency must give priority to the choices that offer services, programs, and activities in the most integrated setting that is available and appropriate. Additionally, all newly constructed public facilities must be fully accessible to people with disabilities.

Undue Burden

A “grandfather clause” does not exist in the ADA; however, the law is flexible. Local government agencies must comply with Title II of the ADA and must provide program access for all individuals. With respect to complying with Title II, a local governmental agency does not have to take any action to make a feature compliant to ADA standards if that agency can demonstrate that the alteration will result in the creation of a fundamental alteration to the program or service or will cause undue financial and/or administrative burden. The determination of an undue burden can only be made by the head of the local public agency (or a designee) and must be accompanied by a written statement outlining the reasons for reaching such a conclusion. In order to establish that an alteration of a feature will cause undue financial and/or administrative burden, an evaluation of all resources available for use in the program must be completed. The evaluation of these resources must include the amount of financial resources available, the effect on expenses and resources, the type and location of the facility, and the number of employees at the site.

If an alteration of a feature would result in a burden, the public entity must take any other action that would not result in an undue burden but would ensure that individuals with disabilities receive the benefits and services of the program or activity.

Safe Harbor

Elements in facilities built or altered before March 15, 2012 that comply with the 1991 ADA Standards for Accessible Design (1991 Standards) are not required to be modified to specifications in the 2010 Standards. For example, the 1991 Standards allow the maximum side reach control part of a paper towel dispenser to be 54 inches. The 2010 Standards lower that side reach range to 48 inches maximum. If a paper towel dispenser was installed prior to March 15, 2012 with its highest operating part at 54 inches, the
paper towel dispenser does not need to be lowered to 48 inches. Since the dispenser complies with the 1991 Standards, that Standard provides a “safe harbor”.

**Historic Properties**

Exceptions to the ADA have been made for historic properties that are listed, or are eligible for listing, in the National Register of Historic Places, or a property designated as historic under state or local law. A public entity is not required to make alterations that would destroy or threaten the historical significance of an historic property. In such a case, alternative requirements may be used as discussed in 28 CFR 36.405 and ADAAG 4.1.7(3). An example of an alternative requirement would include providing displays and written information in a location where they can be seen by a seated person.

**Curb Ramps**

When streets and roads are either newly built or altered ramps must be constructed whenever curbs or other physical barriers exist at the connection point between the roadway and a pedestrian walkway. Likewise, when new sidewalks or walkways are built or altered, they must also contain curb ramps or sloped areas wherever they intersect with a street or roadway. However, at existing roads and sidewalks that have not been altered, local governmental agencies may choose to construct curb ramps at every point where a pedestrian walkway intersects a curb, but they are not necessarily required to do so. Under program access, alternative routes to buildings that make use of existing curb ramps may be acceptable where persons with disabilities must only travel a marginally longer route.

**Public Right of Way Accessibility Guidelines (PROWAG)**

Sidewalks, street crossings, and other elements in the public right-of-way can pose challenges to accessibility. ADA and ABA Accessibility Guidelines focus mainly on facilities on sites. While they address certain features common to public sidewalks, such as curb ramps, PROWAG addresses the conditions and constraints unique to public rights-of-way. While PROWAG has not officially been adopted into law at the federal level, it is considered to be best practices by the Massachusetts Office on Disability.

**Massachusetts Architectural Access Board – M.G.L c. 22 Section 13A**

The Massachusetts Architectural Access Board (MAAB) is a regulatory agency within the Massachusetts Office of Public Safety that develops and enforces regulations to make public building accessible to, functional for, and safe for use by persons with disabilities. MAAB regulations are outlined and enforceable as part of the Massachusetts Building Code.
Three Preliminary Steps to ADA Compliance

The following procedures and accompanying documentation are required as part of the ADA Title II Compliance. Greenfield has many of these policies in place and can be seen in upcoming sections of the ADA Transition Plan.

**Designation of an ADA Coordinator**

Title II of the ADA applies to programs, services, and agencies of state and local governments, regardless of the size of the public entity. It is important for all municipalities to designate at least one municipal employee to take on the functional responsibilities as an ADA Coordinator. This position bears the full responsibility of implementing the ADA within a Title II entity. Providing leadership and motivation to the community and staff while maintaining current knowledge is a tough and demanding job. Harnessing necessary resources and networking with colleagues is the key to success in this position. The most important requirement of an ADA Coordinator is the ability to learn and understand all of the ADA regulations as it pertains to the municipality. This person should realize that the ADA is a Civil Rights Law .... not a building code. A person in this position should:

- Have knowledge of all municipal programs, services, and eligibility requirements.
- Be familiar with Human Resources as it applies to employment issues for policy changes, grievances and effective accommodations.
- Have access to facilities personnel and local Building Inspectors for consultation on architectural accessibility concerns.
- Have knowledge of the municipal ADA Transition Plan and administration of the plan’s compliance, amendments and reviews.

It is suggested for a community the size of Greenfield, that the ADA Coordinator’s position be a part-time position, divided by 2 different City employees. One ADA Coordinator position designated from Personnel/Human Resources to address internal employment related items specific to the Titles I & V of the ADA as well as the Equal Employment Opportunity Commission (EEOC) regulations. The other ADA Coordinator position filled by an employee willing to first learn and apply knowledge of all aspects of the ADA and Section 504. At the outset, fulfilling the duties required of the ADA Coordinator may exceed 10 to 20 hours a month. The reason being that initially the ADA Coordinator will be educating themselves with ADA laws and compliance issues for the City. These will include the ADA Self-Evaluation findings, monitoring the ADA Transition Plan, the ADA Grievance Procedures, public postings of ADA Notice, and informing City personnel and the general public of the existence of the City’s ADA Coordinator. Subsequent to the initial learning curve it is believed that this position will require no more than 10 hours per month to address issues akin to; assisting in providing reasonable accommodation requests, resolutions of complaints or grievances, and documentation and administration.

**Posting of an ADA Notice**

The City shall publicly post notice that the City abides by Title II of the Americans with Disabilities Act (ADA). This notice shall be posted in perpetuity located in at least one
prominent public area usually designated as a public information site. Publishing and publicizing the ADA notice is not a one-time requirement. State and local governments should provide the information on an ongoing basis, whenever necessary. If you use the radio, newspaper, television, or mailings, re-publish and re-broadcast the notice periodically.

The notice is required to include relevant information regarding Title II of the ADA, and how it applies to the programs, services, and activities of the public entity.

The notice should not be overwhelming. An effective notice states the basics of what the ADA requires of the state or local government without being too lengthy, legalistic, or complicated. It should include the name and contact information of the ADA Coordinator.

This chapter contains a model “Notice Under the Americans with Disabilities Act” created by the Department of Justice. It is a one-page document in a standard font, and includes brief statements about:

- Employment,
- Effective communication,
- Making reasonable modifications to policies and programs,
- Not placing surcharges on modifications or auxiliary aids and services, and
- Filing complaints.

**Posting of General ADA Grievance Procedure**

The City shall publicly post the City of Greenfield's "Grievance Procedure under the Americans with Disabilities Act."

Local governments with 50 or more employees are required to adopt and publish procedures for resolving grievances arising under Title II of the ADA. Grievance procedures set out a system for resolving complaints of disability discrimination in a prompt and fair manner.

Neither Title II nor its implementing regulations describe what ADA grievance procedures must include. However, the Department of Justice has developed a model grievance procedure that is included at the end of this chapter.

The grievance procedure should include:

- A description of how and where a complaint under Title II may be filed with the government entity;
- If a written complaint is required, a statement notifying potential complainants that alternative means of filing will be available to people with disabilities who require such an alternative;
- A description of the time frames and processes to be followed by the complainant and the government entity;
- Information on how to appeal an adverse decision; and
- A statement of how long complaint files will be retained.
Self-Evaluation & Transition Plan Requirements

ADA Title II Self-Evaluation Requirements
The self-evaluation plan helps determine the adequacy of ADA compliance in public right of ways (PROW) and buildings, and to ensure that there is not discrimination in City-provided services, meetings, and programs. If the City decides there is an undue burden in providing access or services such as a fundamental alteration of a building or service provided, or a financial burden, state and local governments must ensure that these decisions are made properly and expeditiously. Specific activities that should be evaluated relate to access, inclusion, communication, and safety. The self-evaluation needs to include the persons consulted, problem areas, and description of any modifications that have been made.¹ The activities and requirements that should be evaluated are listed below.

Ensure Access to buildings, programs, meetings, and activities
- All physical barriers to accessibility should be removed
- Residents should have adequate access to public meetings
- Construction & Design standards should be met
- Historic buildings include access for disabled where reasonable

Inclusion and non-discrimination of disabled people
- Ensure program materials are not offensive to the disabled
- Ensure employment practices are not discriminatory to disabled
- Ensure programs, activities, and services are not exclusionary to those with disabilities and former drug users

Availability of Proper Alternative Communication Methods
- Communicate effectively with disabled by providing direct access for TDD’s and TTY’s.
- Have a method for including provisions for readers or interpreters for impaired people. If equipment is required, make sure it works properly and is maintained.
- Ensure employees are familiar with the policies and practices for the full participation of individuals with disabilities.

Proper Safety Procedures
- Evaluate procedures to evacuate individuals with disabilities during an emergency. Visual and audible warning signals, and procedures for assisting individuals from a facility during an emergency should all be included.

**ADA Title II Transition Plan Requirements**

The Transition Plan ensures that aspects of the self-evaluation that were determined to be out of compliance are remedied in the most efficient way possible. The transition plan includes the list of policies and accessibility concerns but also includes a timeline and budget for each of these ADA compliance challenges. Adding a budget and timeline helps establish priority to make buildings, services, and programs as safe and accommodating to disabled residents and visitors. In addition to the budget and timeline, someone in the City should be designated as the official responsible for implementing the plan.\(^2\) Below is a summary of what needs to be included in the transition plan.

1. A list of physical barriers in a public entity’s facilities that limit the accessibility of its programs, activities, or services to individuals with disabilities.

2. A detailed outline of the methods to be utilized to remove these barriers and make facilities accessible.

3. The schedule for taking the necessary steps to achieve compliance with Title II. If the time for achieving compliance is longer than one year, the plan should identify the interim steps that will be taken during each year of the transition period; and,

4. The name of the official responsible for the plan’s implementation.

---

Self-Evaluation

Public Participation

Between the months of March and June 2018, Greenfield and BRPC worked earnestly to gather public input to discover major concerns and priorities for ADA accessibility. Public outreach was critical to the development of the self-evaluation and creating priorities and schedules for the transition plan.

BRPC facilitated a listening session with the Commission on Disability Access (CDA) at their public meeting on March 20th. The meeting was held at the 2nd Floor Conference Room at the Greenfield Town Hall. Many of the members of the CDA have disabilities and were a key resource to discuss accessibility to Greenfield programs and services. Topics discussed varied and included concerns of being able to safely navigate sidewalks and curb ramps. In some circumstances, residents with blindness are unable to orient themselves at crosswalks and at curbs. There was a lot of discussion around sidewalks not being safe for people in wheeled mobility devices who end up with pain from navigating brick sidewalks and cracked concrete. Unsurprisingly, the topic of stigma and discrimination was a key concern that many members of the commission had, and they were adamant on ensuring that the plan could be used as a tool to raise awareness of the importance of ADA accessibility. This meeting was posted in accordance with Massachusetts Open Meeting Law. The City’s ADA Grievance Procedure and Notice of Non-Discrimination are posted on the CDA’s section of the City website.

BRPC held two listening sessions on April 26, 2018 at the Greenfield Council on Aging’s public meeting and the Sustainable Greenfield Committee. These meetings were posted in accordance with Massachusetts Open Meeting Law.
**Policies, Programs, and Meetings**

**Public Meetings**

When residents have access to public meetings, they can be engaged in their community and will be inclined to improve it. The City of Greenfield has upwards of 29 boards, commissions, and task forces that have public meetings. These public meetings are held in a variety of City buildings that range in accessibility. There are about ten rooms in seven different buildings where meetings are held, two/thirds of which are held in either the Town Hall or 114 Main Street. Three board’s meetings are held in the library which was determined as part of the self-evaluation for City buildings to be inaccessible.

Programs and Services

Departments that provide services to the public need to ensure that they are not in conflict with Title II of the Americans with Disabilities Act. Removal of architectural barriers and access to the buildings that these services reside in were evaluated as part of the building evaluations completed by BRPC’s building specialist sub-consultant. In addition to physical access, departments that provide services need to also ensure that they are relating with the public in a manner that is not discriminatory to the disabled. This includes having policies in place that outlines the responsibility of the City to provide accommodations. These policies usually include which alternative communication methods are available such as interpreters, braille, and text telephones, but also include department procedure for providing non-discriminatory alternatives may not be feasible in circumstances where equal access (i.e. having meetings in an accessible office that provides privacy if the normal office is inaccessible).

The City of Greenfield identified 19 departments that provide services to the public. The services that the departments provide include direct government services, activities that the public can participate in, and emergency services.

**Major Findings**

- The City of Greenfield does not have a TTY (teletypewriter) number for residents with hearing impairments to contact any departments including emergency services like fire and police. Only DPW seems to have familiarity with how to communicate with TTY. The Recreation Department has worked with interpreters over the phone, but do not have any formal training.
- The Human Resources Department does not have any training materials for ADA compliance. Other departments do not have their own training either.
- The City does not specify which accommodations it will or can make to disabled persons.
- No departments have their own ADA policies outlining what accommodations they can make to persons with disabilities.
- There is no policy in place outlining what constitutes as an undue burden to the City concerning ADA compliance.
- The Parks and Recreation Department lists no motorized vehicles on the beach, as well as no pets, but does not specify accommodations for a beach-friendly motorized vehicle for mobility-impaired residents or exceptions for service animals.
- Only the school has any disability policy and has clear procedures of how to follow Section 504. The school also develops accommodation plans for students with disabilities.
- No departments have equipment on-hand to assist with communication with disabled residents and visitors nor is there anything on-hand to assist residents and visitors with comprehension such as closed captioning on videos or braille.
City Website

The City of Greenfield’s municipal website is an important tool to communicate with residents in the City. It provides information on upcoming events, City services and programs, and public meetings. However, if this tool is to be accessible to all residents regardless of disability, it needs to be accessible to residents who use alternative means to navigate the website. Through evaluation of City departments that provide services to the public, the following recurrent concerns were discovered.

- There are no TTY or Relay Service # for residents to contact the City on the website.

In addition, there were specific non-compliant aspects of the website that should be changed to allow better accessibility.

</table>
City Buildings and Schools

Each City Building was surveyed to determine ADA accessibility using the 2010 ADA Standards for Accessible Design. These standards help determine accessibility from the parking lot to the entrance of the building, and into the building to essential services and restrooms. BRPC also used the New England ADA Center’s ADA Checklist for Existing Facilities as a model to develop the survey that was used to determine ADA Compliance in City Buildings. BRPC contracted with a Massachusetts State Building Commissioner to conduct the surveys on each City building and school. These buildings were also ranked by accessibility which range from fully accessible to completely inaccessible.

Two of the buildings assessed, the Community Center and high school, were built in 2017 and 2015 respectively and are the only two fully ADA accessible City-owned buildings. The Community Center is the model for ADA accessibility in the City with automatic doors, warning pads on all the accessible routes from accessible parking, a variety of inclusive activities, and acoustic ceiling clouds to reduce reverberation.

In the evaluation of City buildings, the library was classified as inaccessible. The accessible route crossed emergency vehicle lanes and did not have proper signage to the accessible entrance. At the accessible entrance, the ramp was dangerous and not maneuverable. Inside the entrance, the route to the bathroom and library services was narrow and had protruding shelves and railings.

---

The City of Greenfield is already taking huge steps to make the library more accessible and is in the process of designing a new library that will exceed 2010 ADA accessible design requirements and allow much better inclusivity for people with disabilities. Many members of the Commission on Disability Access have attended meetings regarding the project and are committed to raising awareness on ensuring that the new library is fully accessible. If this project is to reflect the City’s most recent commitment to building accessible buildings as is evident in the Community Center and the high school, the library is likely to be an accessible and inclusive resource for all City residents.

If the City wants to make the library productive in the future, however, they will need to make extensive repairs and reorganize the interior space and exterior space of the buildings, including all the required changes that are outlined in the transition plan.

The complete building and schools surveys are included in Appendix E.

**Fully Accessible**

A fully ADA accessible building allows full access to City buildings as well as programs and services for a wheeled mobility device user or person with mobility challenges including those using a wheeled mobility device.

**Community Center** - The Building and grounds are ADA compliant the building is new construction and meets all ADA requirements. The building is 9,812 square feet and features community office space and four program rooms that have activities, including classes, exercise, games, internet-enabled computer access and movies. The building has been designed to meet or exceed ADA requirements and there are many areas that can assist those with disabilities. Such accommodations include acoustic ceiling clouds that reduce reverberation and automatic doors.

**High School** - The Building and grounds are ADA compliant and the route from parking to entrance is a compliant accessible route. The service areas and restrooms are ADA compliant. The High School is new construction as of 2015 and the facility is ADA compliant. The High School would be classified as Accessible building which allows full access to City buildings as well as programs and services for wheeled mobility device users.

**Mostly Accessible**

A mostly ADA accessible building allows access for people with mobility challenges to City building’s primary function and restrooms.

**Police Station** - The police station is mostly accessible. The building and grounds are generally ADA compliant. Non-compliant features include:

- The exterior route from parking to the entrance is not compliant because there are mats on the accessible route.

Overall, this building allows access for people with mobility challenges to City building’s primary function and restrooms.
City Offices / 20 Sanderson Street - The building and grounds are not ADA compliant. Non-compliant features include:

- The route from parking to entrance is not compliant.
- The entry door is not ADA Compliant.
- The service areas within the different departments do not have accessible routes.

Overall, the City Offices / 20 Sanderson Street is mostly accessible as this building allows access for people with mobility challenges to City building's primary function and restrooms.

Planning - The Building and entrance are not ADA compliant. Non-compliant features include:

- The accessible route from site arrival points and accessible entrance is not stable.
- The ramp to the sidewalk on the route to the building is a brick path and is uneven.
- The women's restroom has storage in the turning points for wheelchair accessibility.
- The men's restroom is not accessible, and the route is obstructed.
- Both restrooms lack appropriate door handles.

The planning building would be classified as mostly accessible where it allows access for people with mobility challenges to City's primary function and restrooms.

Middle School - The Building and grounds are ADA compliant. The route from parking to entrance is not a compliant accessible route. Service areas and restrooms are not ADA compliant either. The non-compliant features in the school include:

- The accessible route from parking to accessible doors crosses through the morning drop off point for parents dropping off their children.

The Middle School is classified as mostly accessible where it allows access for people with mobility challenges to City's primary function and restrooms.

Newton School - The building and grounds are not ADA compliant. Non-compliant features include:

- The route from parking to the entrance of the school is not an ADA compliant accessible route.
- The service areas, restrooms, and related signage are not ADA compliant

Newton School is mostly accessible. The building allows for people with mobility challenges to City building's primary function and restrooms.

Four Corners School - The Building and grounds are not ADA compliant. Non-compliant features include:
• The route from parking to entrance is not a compliant accessible route.

• The service areas and restrooms have obstructions and do not have proper signage to be ADA compliant.

Four Corners School is mostly accessible. The building allows access for people with mobility challenges to City building's primary function and restrooms.

**Moderately Accessible**

A moderately ADA accessible building allows access to City building’s primary function, but restrooms and other programs and services may be difficult to access for persons with mobility challenges.

**Town Hall** - The building and entrance are not ADA compliant. Non-compliant features include:

• The accessible route from site arrival points and accessible entrance is not stable.

• The route ramp path and is uneven and blocked by trash containers.

• The restrooms on the lower level do not have the turning points for wheelchair accessibility.

• Access to many of the City departments within Town Hall are not accessible.

The Town Hall is classified as moderately accessible. It allows access to City building's function, but restrooms and other programs and services may be difficult to access for persons with mobility challenges.

**Veterans Center** - The building and grounds are not ADA compliant. Non-compliant features include:

• The accessible route from site arrival points and accessible entrance is not stable, firm or slip-resistant.

• The route to the front desk is obstructed and there is not an accessible service area.

The Veteran’s Center is a moderately accessible building and allows access to the building’s primary function, but restrooms and other programs and services may be difficult to access for persons with mobility challenges.

**North Parrish School** - The building and grounds are not ADA compliant. Non-compliant features include:

• The route from parking to entrance is not a compliant accessible route.

• The service areas and restrooms are not ADA compliant.

The North Parrish School is a moderately accessible building which allows access to the building's primary function, but restrooms and other programs and services may be difficult to access for persons with mobility challenges.
Federal Street Elementary - The building and grounds are not ADA compliant. Non-compliant issues include:

- The route from parking to entrance is not a compliant accessible route.
- The accessible route needs to be resurfaced and repainted to indicated route clearly.
- The service areas and restrooms signage are not ADA compliant.
- The accessible route to the elevator is obstructed with tables and other items.

The Federal Street Elementary School is moderately accessible. The building’s primary function is accessible, but restrooms and other programs and services may be difficult to access for persons with mobility challenges.

Minimally Accessible

If a person with mobility challenges can enter the City building but not access programs or services, nor restrooms, then the building is minimally accessible.

Fire Station - The building and grounds are not ADA compliant. Non-compliant features include:

- The route from parking to entrance is not a compliant accessible route.
- The service areas and restrooms are not ADA compliant.

The Fire Station is minimally accessible where a person with mobility challenges can enter the City building but not access programs and services, or restrooms. The building was built before the Americans with Disabilities Act of 1990 including the modifications made by the ADA Amendments Act of 2010. The Fire Station would need extensive renovations to address ADA compliance.

Inaccessible

A building is inaccessible if a physical barrier prevents a person with mobility challenges from entering the City building.

Library - The building and grounds are not ADA compliant. Non-compliant features include:

- The accessible route from site arrival points and accessible entrance is not stable, firm or slip-resistant.
- The route ramp has large crevices and is uneven.
- The restrooms are locked, and the public must first go to front desk to acquire the key to gain access to restroom facilities.
- The signage indicating accessible elevator is very small and accessing the elevator on the route is difficult.
- Aisles are not wheelchair accessible.
• Children section is also not ADA compliant the area has a step down and does not allow for wheelchair accessibility.

The library is inaccessible with several physical barriers preventing a person with mobility challenges from entering the City building. The building was also built before the Americans with Disabilities Act of 1990.

**Green River School** - The Building and grounds are not ADA compliant. Non-compliant features include:

• The accessible route from parking to entrance is damaged, the travel surface is uneven and does not provide smooth transition from parking to building entrance.

• The front entrance is not ADA compliant the door hardware is not accessible as is also the call button hardware to gain access into the building.

• The service areas and restrooms are not ADA compliant at this time as the building is under construction.

• The interior needs to be upgraded to provide ADA compliant signage in all areas, classrooms and restrooms.

• The playground area is not ADA compliant as there is no accessible route.

These areas should be reviewed during construction to ensure that ADA compliant conditions are met for the grade levels that will be attending the school.

**GCET Building** – Non-compliant features of the GCET building include:

• The entrance is not ADA compliant.

• An accessible route from site arrival points and accessible entrance is not provided.

• The entrance is not ADA compliant and does not have an automatic opener to allow for accessibility.

The GCET Building is classified as inaccessible. It is inaccessible for people with mobility challenges to Town's primary function and restrooms.
Accessibility Challenges for all City Buildings & Schools
Approach and Entrance

Accessible Exterior Route – Most municipal buildings in Greenfield have inaccessible routes from accessible parking to the entrance. The remedies to these compliance issues range from repairing sidewalk along the accessible route to rearranging parking and redesigning a new accessible route to the building.

- The library’s accessible entrance ramp has cracks and crevices. Route from parking to entrance crosses an emergency vehicles lane.
- Accessible route from parking to entrance at the Veteran’s Center has large crevices and is uneven.
- There is not an accessible route to the entrance of the fire station from accessible parking.
- Accessible route from on-street parking location in front of 114 Main Street is uneven and not stable.
- Route to City Offices entrance is uneven, damaged, and door is not ADA compliant.
- The surface of the route to Federal Street entrance is not stable or accessible.
**Access to goods and services**

**Interior Accessible Route** – Several municipal buildings and schools have no access to offices, programs, services, or restrooms upon entrance to the building.

- There is no interior accessible route upon entrance to the Veteran’s Center.
- Accessible route to the elevator in library has obstructions.
- Long table and trash can is an obstruction to access the elevator at the Federal Street Elementary School.

**Restrooms**

**Signage** – Many buildings do not have correct signage for accessible restrooms including correct height of lettering and sometimes absence of tactile lettering.

- Accessible restrooms have non-compliant signage with no tactile characters in Federal Street Elementary School.
- Accessible women’s restrooms have non-compliant signage at Four Corners School.
- Handicap Accessible restroom in North Parish School does not have correct signage.
Public Right of Way (PROW)

Having an accessible public right of way has been enforced through Title II of the Americans with Disabilities Act which ensures that covered entities ensure programs and services are accessible to, and usable by, persons with disabilities. Because public rights of way are available to everyone, they must be made accessible for everyone. This has been solidified by court cases such as Fortyune v. City of Lomita which determined that programs and services include on-street parking and Barden v. City of Sacramento which originally interpreted programs and services broadly to include public sidewalks and streets even in the absence of specific design specifications. In Massachusetts, the best practices for providing accessible public rights of way is the Public Right of Way Accessibility Guidelines (PROWAG).

Snow and Ice Clearance from City Sidewalks

In 2015, the City of Greenfield passed a snow removal ordinance that requires sidewalks to be clear of snow. The ordinance states:

“The owner of any real estate abutting any City way where there is a sidewalk shall, within 24 hours after the ceasing to fall or form or the accumulation from any other cause of any snow, ice or sleet upon said sidewalk, cause the same to be removed therefrom, for four feet up to the full width of the sidewalk and including abutting curb cuts/ramps; and if the same cannot be wholly removed shall sprinkle thereon sand or other substance so that such sidewalks shall be safe for travel.”

This was a step in ensuring safety procedures during the winter for persons with disabilities including people in wheelchairs and those with limited or no vision. It’s a big concern in areas that have aging sidewalks, curb ramps, and near accessible parking.

---

6 Barden V. City of Sacramento 292 F.3d 1073, 1076 (9th Cir. 2002). Retrieved from www.justice.gov.
2016 Sidewalk Conditions Survey Update

In 2016, the City of Greenfield updated their sidewalk conditions survey for the first time in nearly 20 years. While the City is continually repairing and replacing sidewalks to make them accessible and safe for pedestrians and those who use the assistance of a motorized wheelchair, the City needed a way to prioritize which sidewalks posed the greatest risk to accessibility challenges for pedestrians with disabilities. Each sidewalk was rated on a scale of 1 to 5 to determine priority. Those with a scale of 5 need to be replaced immediately and those that are determined to be a 1 were most likely recently replaced.

Priority Areas

As part of the curb ramp evaluation, city staff identified several priority walking routes and areas throughout the city. These are generally major city streets that can be used to access civic and public facilities like schools and parks, commercial destinations, and medical centers. These are areas where the city investments in pedestrian infrastructure will create the most impact.
Curb Ramps
BRPC with guidance and assistance from the City Engineer worked together to develop a plan to most efficiently survey the condition of curb ramps in Greenfield.

BRPC’s evaluation of curb cuts focused on city center streets with high pedestrian traffic and closest proximity to government services and main routes for students who walk to school. These streets will have the most demand to accommodate everyone with accessibility challenges. Every curb cut surveyed was photographed. There were several recurrent challenges that were determined to restrict accessibility for disabled residents and visitors. The first is that a high percentage of curb cuts did not have a warning panel with truncated domes. Most curb cuts in residential areas had no warning panel at all. Another recurrent challenge is that many crevices between the sidewalk and street were filled in with asphalt which overlapped the curb ramp and caused a level change of greater than ½”. In other instances, the concrete was cracked at the transition between sidewalk and street. Another city-wide issue is the use of diagonal curb ramps and the lack of painted crosswalks in many locations. The City should implement perpendicular ramps when feasible.

There were specific areas that had major accessibility concerns throughout the City center and primarily residential streets that were surveyed. Along Main Street, loose bricks created a barrier to getting to some of the curb ramps that crossed Main Street. In some instances, there was accessible path to the curb ramp because the path was all brick between the sidewalk and the ramp. Along main street, brick pavers cross the sidewalk in several yard intervals. This causes people in wheelchairs discomfort and sometimes injury. Accessibility concerns were greatest on Wells Street between the intersections at Legion and Arch streets. This area has had reported injuries from people with ambulatory and vision disabilities. Around 75 Wells Street, brick pavers are extremely warped and breaking from tree roots and the sidewalks are warped and with several inch-high level changes at various points along the sidewalk.

Crosswalk at Legion Ave and Wells Street

Deteriorated Curb Cut at on Wells Street
On-Street Parking

On-street parking has been interpreted through case law to be a public service that needs to meet ADA accessibility standards. Because there are no specific ADA guidelines to determine how many ADA accessible on street parking spaces are required, this evaluation was completed using the Public Right of Way Accessibility Guidelines (PROWAG). These guidelines require a total number of on street parking spaces based on the total number of marked or metered parking spaces on the block perimeter.

Below is the map of parking in Greenfield’s downtown and includes accessible spaces. BRPC Staff did an overall evaluation to determine if there were the correct number of ADA accessible spots in Greenfield’s downtown and whether or not there were accessible routes to the sidewalks. As part of the building surveys completed on municipal buildings, on street parking and accessible routes were surveyed for compliance with access to services. The main concerns when evaluating accessible parking include:

- Only 2% of on-street parking spaces were accessible and no van accessible spaces exist downtown.
- Many accessible parking spaces do not have correct signage with the international symbol of accessibility.
- Many accessible parking spaces did not have clear accessible routes to the sidewalk and some routes require travel into the street to get to a curb ramp.

Other General Public Right-of-Way Concerns and Complete Streets

Throughout the ADA self-evaluation process, BRPC staff also noted general connectivity and Complete Streets issues for consideration by the City. These are presented here:

Connectivity Concerns

Create a nonmotorized connection between Leyden Woods and the Greenfield downtown. This could take the form of a shared-use (combined biking/walking) path along Leyden Rd / Conway St. The total path length would be around 2.5 miles. Sidewalk and bike lanes could also help create this connection. Moreover, the additional shared-use path could become a recreation asset for the larger community while simultaneously addressing the transportation needs of a low-income community that is less likely to have access to an automobile.

Improve connections between Greenfield Community College (GCC) and downtown and the Route 2 commercial area west of the I-91 Exit 26 Rotary. Currently a wide shared-
use path extends from the college down College Dr. However, the path ends at Colrain Rd. In the long-term, the City should consider extending the path south along Colrain Rd. to the commercial area along Route 2. To improve connections from the college to downtown, one possible route is along Colrain St., which crosses I-91 near College Dr. Nonmotorized connections from the college along Colrain St. would avoid crossings of the intimidating I-91 rotary.

In general, crossing the I-91 Exit 26 rotary is extremely intimidating. Currently a sidewalk runs along the north side of the rotary and crosses it at two points. The City should examine creation of a long-term nonmotorized connection between the college and commercial area and downtown that avoids the rotary altogether.

**Design Considerations**

The self-assessment noted a lack of van-accessible on-street parking in the downtown area as well as the lack of or distance from accessible on-street parking to curb ramps. Most of the ramps that serve accessible on-street parking are similar to the MassDOT “greater than 12’-4” sidewalk” design (E 107.3.0)\(^8\). These ramps take up a considerable amount of sidewalk “real estate” and can create pinch points for pedestrian traffic in some cases. The City should consider using ramp designs found in MassDOT drawings E1 07.2.0 and E 107.2.1 to access on-street parking. These designs could be modified with an additional length of curbing installed near the back of the ramp. These ramp designs occupy a considerably smaller footprint on the sidewalk than the existing ramps and would leave greater room for overall pedestrian travel.

Consider adopting the MassDOT curb ramp designs from the 2016 Standard Construction Details into city design guidelines.

**Walkability and Crossing Concerns**

- Consider installing additional pedestrian crossing, or refuge, islands in downtown to mitigate long crossing distances. Ensure existing islands have pedestrian warning (truncated dome) panels installed (see page 97 for design guidelines).
- Consider installing curb ramps and crosswalks at the intersection of Pleasant and Chapman St.
- Many crossings, particularly on residential streets lack a painted crosswalk. Consider a city-wide crosswalk painting program.
- Many curb ramps are not fully contained within the painted crosswalk. Consider widening the crosswalk as necessary to ensure the curb ramp is fully contained within the crosswalk.
- Many curb ramps throughout the city are placed diagonally at the apex of each street corner. Consider installing two parallel ramps at each corner to replace existing diagonal curb ramps.
- Many mid-block crossings lack warning signage. Consider installing crosswalk warning signs (MUTCD W11-2) at mid-block crossings.

---

\(^8\) https://www.massdot.state.ma.us/Portals/8/docs/construction/ConstructionStandardDetails2016.pdf
Greenfield updated their Open Space and recreation plan in 2012. One of the requirements of a state-approved Open Space and Recreation Plan is an ADA Access Self Evaluation. The ADA Self-Evaluation describes how accessible a community’s conservation and recreation programs are to people with disabilities. The goal of this plan is to highlight what still needs to be accomplished so that more people can enjoy the parks and recreation programs offered by the City.

During the ADA self-evaluation it was discovered that the 2012 Open Space and Recreation Plan recycled the evaluation of parks and recreation spaces from 1999 surveys. Therefore, an ADA evaluation of parks and recreational areas had not been completed in nearly 20 years. New surveys were completed in April 2018 using the Open Space and Recreation Survey.

**Abercrombie Field** – The field and viewing areas are not ADA compliant. Accessibility concerns include:

- The route from parking to viewing is not a compliant accessible route.
- The accessible routes to field is not compliant.

Abercrombie Field is inaccessible and does not allow access to the ball park’s primary function and services.

**Beacon Field** – The field and viewing areas are not ADA compliant. Specific accessibility concerns include:

- The route from parking to viewing is not a compliant accessible route.
- The accessible routes to field is not compliant.

Beacon Field is classified as inaccessible and does not allow access to parks primary function and services.

**Davis Street Tennis Park** – The grounds and Tennis courts are ADA compliant. Accessible features include:

- The route from parking to entrance is a compliant accessible route.
The tennis courts are classified as mostly accessible.

**Greenfield Energy Park** – The Energy park areas are provided with an ADA compliant routes. Some accessibility concerns include:

- the accessible route from parking needs repairs.

Energy Park is classified as moderately accessible and allows access to parks primary function, but it may be difficult to access for persons with mobility challenges.

**Green River Dog Park** – The Dog park areas are providing with an ADA compliant route. Accessible features include:

- There is an accessible route to the park from parking area.

The Green River Dog Park is classified as accessible it allows access to the park’s primary function for persons with mobility challenges.

**Hillside Park** – The field and play areas are able to be accessed by an ADA compliant route from the parking area. Hillside Park is considered to be accessible as it allows access to parks primary function and services.

**Lunt Field** - The field and viewing areas are not ADA compliant. A summary of inaccessible features includes:

- The route from parking to the viewing area is not a compliant accessible route.

Lunt Field is inaccessible. It does not allow access to the park’s primary function and services.

**Municipal Swimming and Recreational Area** – The park areas can be accessed by an ADA compliant route. Some accessibility concerns include:

- The accessible route from parking area needs surface repairs.

The Greenfield swimming area is classified as moderately accessible and allows access to parks primary function, but it may be difficult to access for persons with mobility challenges.

**North Greenfield Park** - The field and viewing areas cannot be accessed by a compliant route. Accessibility concerns at the site include:

- The route to the viewing areas from the parking area is not ADA compliant.
- Uneven grade on the field.
- The structure on the property is dangerous if used for any function currently.

North Greenfield Park is inaccessible and does allow access to parks primary function and services.

**Poet’s Seat in Rocky Mountain Park** – The Rocky Mountain Park/Poet’s Seat Tower is not ADA compliant. Accessibility concerns include
• The route from the parking to the entrance is not a compliant accessible route.
• There are only stairs to the tower that prevent someone with mobility challenges from using area.
• There are no van-accessible parking spaces.

Poet’s Seat is inaccessible.

**Shattuck Park** – The park is not ADA compliant. Inaccessible features include:

• The route from parking to areas in the park are not along a compliant accessible route.

Shattuck Park is inaccessible and does not allow access to the park’s primary function and services.

**Town Common** – The City Common area has an ADA compliant route from the parking lot to entrance of commons. The Town Common is classified as mostly accessible and it allows access to the park’s primary function and services.

**Veterans Mall** – The Veterans Mall area has an ADA compliant route from City parking to entrance of the mall. Veteran’s Mall is classified as Mostly Accessible and allows access to parks primary function and services.
Greenfield last assessed their parking lots for ADA accessibility to program and services in 2013. As part of the assessment, ten municipal parking lots were surveyed. Since 2013, one of those lots has been removed, and two others have been upgraded or redone. BRPC staff looked at parking maps completed in 2016 by the City engineer to confirm that the correct number of parking spots were being provided and that they were the closest parking spots to buildings and sidewalks. The Town Hall and Fire Station lots were fully evaluated during the self-evaluations for the Town Hall and Fire Station by BRPC.

### City Parking Lots

Transition Plan – Municipal Buildings & Schools

The City of Greenfield has proven that it is committed to ADA compliance in City buildings and Schools, especially in the construction of new buildings. The two buildings considered to be fully accessible are the Community Center, built in 2017 and the High School, built in 2015. The City is also in the process of designing the new library and many of the community members have shown up to meetings to voice their support for going above and beyond the minimum requirements of ADA accessibility to make it a model for ADA compliance. However, there are many City buildings and schools that are not compliant, and in some cases, there are barriers that create a safety concern for residents with disabilities. With the implementation of the ADA Transition Plan, the City of Greenfield is showing its commitment to making the necessary changes to become ADA compliant including access to services, programs, and meetings. All ADA non-compliant findings for the self-evaluation plan need to have a detailed action item, schedule for completion, and official responsible for completion.

Action Items

The action items were determined by BRPC’s building specialist sub-consultant during the building surveys. Actions were determined based on how the most cost-effective solution to remedy the compliance issue was. For example, if the accessible route to the restroom had shelves that protruded out too far, the better solution would be to add a leg to the bottom of the shelf rather than remove or shorten the shelf. The City also approved actions as appropriate and had input on their importance and schedule for completion.

Cost Estimates

The cost estimates for the action items were developed by BRPC’s building specialist sub-consultant as part of the building surveys. The cost estimates include the estimated cost for materials and construction costs. However, hourly rates for workers were not included. The City’s public works department has the capacity to complete some of the improvements.

Priorities Determining a Schedule for Compliance

The schedule for compliance of the buildings and schools is prioritized based on their overall accessibility and the time it takes to implement a specific action. As part of the self-evaluation plan, buildings and schools were determined to either be accessible, mostly accessible, moderately accessible, minimally accessible, or not accessible. These determinations are determined in rank of importance:

1. accessibility to the building
2. accessibility to programs and services
3. accessibility to supporting services such as elevators and restrooms, drinking fountains, etc.
For example, ensuring that somebody with a walking cane or wheelchair can safely navigate to the entrance from accessible parking is prioritized higher than ensuring there is accessible signage to the elevators or restroom. Finally, prioritization is also based on safety and buildings that pose a risk to someone who is disabled is prioritized higher than those that have a negligible effect on safety or navigation of buildings and programs.

**Designation of Official Responsible for the Plan**

The Mayor of Greenfield is responsible for the implementation of the transition plan and delegating responsibility for the required work. There has already been support for making ADA compliance a priority from the DPW, community, economic development department, and the schools. When the City appoints their next ADA Coordinator, they will be tasked with day-to-day inquiries about the implementation of the plan and determining whether new City projects are aligned with the transition plan in addition to the responsibility of settling any grievances.

Transition Plan – Parks and Conservation Areas

The City of Greenfield wants there to be equal accessibility to public parks and conservation areas and has taken the first step to completing that by evaluating its parks and conservation areas for the first time since 1999. Since then, a dog park has been added to the Green River Park and a splash pad has been added to Hillside Park. In the 1999 survey, many parks and conservation areas were not ADA compliant, and in some cases, there are barriers that create a safety concern for residents with disabilities. With the implementation of the ADA Transition Plan, the City of Greenfield is committed to making the necessary changes to become ADA compliant which includes access to activities, recreation programs, and certain trails. Using the Massachusetts Open Space and Recreation Plan handbook, the survey for recreational sites was created. Survey results that resulted in ADA non-compliant findings gathered for the parks and conservation areas need to have a detailed action item, schedule for completion, and official responsible for completion.

Action Items

The action items were determined by the BRPC’s building specialist sub-consultant during the park surveys. Actions were determined based on the most cost-effective solution to remedy the compliance issue. For example, if the accessible route to the restroom had no accessible sidewalk or concrete path, the best solution would be to extend the existing path rather than creating a completely new path. The City was also responsible for approving these actions as appropriate and had input on their importance and schedule for completion.

Cost Estimates

The cost estimates for the action items were developed by the BRPC building specialist sub-consultant as part of the parks and conservation area surveys. The cost estimates include the estimated cost for materials and construction costs. However, hourly rates for workers were not included. The City’s public works department has the capacity to complete some of the improvements.

Priorities Determining a Schedule for Compliance

The schedule for compliance of the parks are prioritized based on their overall accessibility and the time it takes to implement a specific action. As part of the self-evaluation plan, parks or conservation areas were determined to either be accessible, mostly accessible, moderately accessible, minimally accessible, or not accessible. These determinations are determined in rank of importance:

- accessibility to the park
- accessibility to programs and services
- accessibility to supporting services such as structures, restrooms, drinking fountains, etc.
For example, ensuring that somebody with a walking cane or wheelchair is able to safely navigate to picnic tables, the restrooms, and other activities from accessible parking is prioritized higher than ensuring there is accessible signage. Finally, prioritization is also based on safety and park activities or structures that pose a risk to someone who is disabled are prioritized higher than those that have a negligible effect on safety or navigation of parks and conservation areas.

**Designation of Official Responsible for the Plan**

Ultimately, the Mayor of Greenfield is responsible for the implementation of the transition plan and delegating responsibility for each required task. There has already been support for the project and making sure ADA compliance is a priority including the department of public works. It is likely that the recreation department will have a large responsibility to ensuring that the City of Greenfield has accessible parks and conservation areas. When the City appoints their next ADA Coordinator, they will be tasked with day-to-day inquiries about the implementation of the plan and determining whether new city projects are aligned with the transition plan in addition to the responsibility of settling any grievances.

*1 = Safety Hazard  2 = Major Barrier  3 = Moderate Barrier  4 = Negligible Impact

Total Estimated Cost: $30,000.00
The City Common was determined to be ADA compliant. It is a small space across from the Town Hall and serves events like the farmer’s market. There is an accessible walkway through it as well.

*1 = Safety Hazard   2 = Major Barrier   3 = Moderate Barrier   4 = Negligible Impact
Transition Plan – Parking Lots

Official in Charge of Implementation

While the Mayor is ultimately responsible for the implementation of the plan, much of the day to day decisions concerning ADA accessibility and the public right of way will be the City Engineer and Department of Public Works. Both these departments are committed to implementing ADA accessible design into parking lots. It will also still be the responsibility of the next appointed ADA coordinator to assist in processing grievances and ensuring that the department’s vision continues to incorporate ADA compliance into its public works strategies.

Cost Estimate

Cost estimates vary for each lot depending on the amount of work that needs to be complete and the severity of the challenge. For example, the City has determined a set price for the cost of creating a new handicap accessible parking space and can be modified based on how many spots need to be created or moved. Another common occurrence in parking lots is the slope of the parking lot, especially where it meets the sidewalk. The cost of making these improvements are approximated based on how severe the slope is and the condition of the current pavement. Costs are ultimately approximated by BRPC staff using knowledge of what materials cost and required budgets for similar projects.

Priority and Determining Schedule

Each barrier determined to hinder or not allow access to the public right of way or buildings for people with disabilities is prioritized on a one 1-4 scale depending on the barriers severity. For example, if an exit onto the sidewalk of the parking lot is a tripping hazard or can cause injury, it is determined to be a safety hazard and a priority 1. If it is a priority 1, it needs to be fixed immediately or very soon. However, other barriers such as having a very small discrepancy in slope from the standards or having one less parking spot than required that could have minor impact yet still disrupt their access would be prioritized lower and could be completed in the near future rather than immediately.

Transition Plan – Public Right of Way

Sidewalks

The City of Greenfield is committed to ensuring that sidewalk infrastructure is safe for its residents and visitors. Because sidewalks are such a critical component for accessibility and safety, the City of Greenfield is always in a state of transition and replacing its sidewalks often. Unsurprisingly, replacing sidewalks can be costly so it's important that sidewalk replacement is done cost effectively and in a manner that will not cause injury or general discomfort for people using wheeled mobility devices or walking with a cane, or even someone people with mobility challenges such as the elderly or children. The sidewalks conditions survey can be used to determine priority areas that are in the worst condition.

Official in Charge of Implementation

While the Mayor is ultimately responsible for the implementation of the plan, much of the day to day decisions concerning ADA accessibility and the public right of way will be the City Engineer and his staff in the DPW. Nicolas Reitzel has already expressed interest in incorporating ADA design and general mobility improvements into the City’s complete streets plans and safe routes to school development. It will also still be the responsibility of the next appointed ADA coordinator to assist in processing grievances and ensuring that the department’s vision continues to incorporate ADA compliance into its public works strategies.

Priority and Determining Schedule

Sidewalks were rated on condition. Condition was determined on a scale of 1 to 5, with 5 being excellent condition and 1 being very poor condition. The City of Greenfield evaluated the condition of sidewalks in its jurisdiction in 2016. BRPC confirmed these ratings and sidewalk.

Sidewalk condition was used to determine replacement need priority and suggested actions for the City. Therefore, it is important that the worst condition sidewalks are replaced first. Sidewalks with a condition rating of 1 or 2 were given a “high” priority for replacement with suggested replacement occurring within 1-10 years. Sidewalks with a condition rating of 3 were given a “medium” priority for replacement with suggested replacement occurring within 10-15 years. These sidewalks should be carefully monitored, and sections should be replaced as funds become available or priority areas shift. Sidewalks with a condition rating of 4 or 5 were given a low priority for replacement, with replacement occurring within 15-25 years. These sidewalks should be monitored for any changes in condition and the town should make less expensive maintenance repairs necessary to prolong their life. The best condition sidewalks should be seen as safe routes and the City should encourage people to use those routes during construction of sidewalks in very poor condition. While a new sidewalk should last about 25 years, there are several factors that make this an educated guess at best. Therefore, the City should encourage periodic reviews of the sidewalk conditions about once every 3-5 years.

Commercial areas should be checked at the lower end of that time period because they have a lot more pedestrian traffic than residential areas, which can be evaluated less
frequently unless there is known to be a high mobility-challenged population can be evaluated less frequently.

Sidewalk Recommendations
Use Complete Streets funding to repair sidewalks that are highly used and in very poor or poor condition. Sidewalks that are in very poor condition should be repaired immediately with local or federal funding in the next fiscal year.

Re-evaluate sidewalk condition surveys every 3-5 years to continually identify the sidewalks that have the most urgent safety concerns for mobility challenged residents.

Encourage travel detour to the best condition sidewalks while repairing the worst condition sidewalks when possible. Adopt a policy for providing alternative routes of travel when road maintenance prevents travel along a section of sidewalk.

Adopt a policy outlining the schedule of repair for sidewalks.

Sidewalk Cost Estimates
Sidewalk replacement costs were estimated at 9.5 / Square Foot for a 5' wide and 4” thick concrete. Sidewalk lengths were estimated from GIS data provided by the City. Costs for sidewalk replacement were determined using the formula Segment Length (ft) * 5ft Width * 9.5/Sq. Ft. = Replacement Cost

Priority and Schedule
Most curb ramps in Greenfield are missing detectable warning panels with truncated domes. In order to install these pads, the concrete panel needs to be replaced in most instances. There are two main ways that the City needs to prioritize replacing cracked curb ramps and installing new warning pads. First is to replace the concrete and add truncated dome warning pads when replacing sidewalks. This will also ensure that the complete sidewalk is becoming safer and accessible for residents with disabilities. Also, because the sidewalk needs to be replaced when installing a warning pad, it creates full accessibility efficiently. Second is to replace major intersection and curb ramps along safe routes to school and part of the City’s complete streets program. This will be an opportunity to add ADA compliance as a necessary aspect of its complete streets program and make streets safer for children walking to school. As discussed in the sidewalk transition plan section, the worst curb ramps will likely be improved when the worst sidewalks are improved within the next fiscal year, and many of the worst curb ramps can be improved as part of the complete streets program. Government services and schools need to be factored into the schedule as well. The curb ramps that cannot be made compliant with grant funding should be prioritized based on its proximity to government buildings and schools evaluated in the buildings and schools transition plan.

The City evaluated overall sidewalk condition in 2016, and BRPC confirmed these ratings in 2018. The ADA self-assessment of sidewalks and curb ramps is based on this assessment of overall condition and did not identify specific ADA barriers. Even newly constructed sidewalk may contain ADA barriers due to flaws in construction, settling of subgrade, or heaving due to freeze/thaw conditions. Moreover, ADA barriers may arise in sidewalks after the completion of this plan.

</table>
**Curb Ramps**

Like sidewalks, curb ramps are continually being replaced and improved by the City. Ramps were evaluated to determine if they had a detectable warning panel and given a compliance rating of 1-3. Ramps rated as 1 do not have a detectable warning panel installed. These ramps are the highest priority for replacement and are likely some of the oldest in the city. The City should review any other notes about condition that were made by BRPC during the evaluation to guide replacement needs. Ramps rated as 2 have a detectable warning panel installed. These ramps are generally newer construction and are a low priority for replacement. Ramps rated as a 3 have a detectable warning panel installed, but there were other factors such as overall condition, nearby crosswalk, or their alignment which may mean they are noncompliant. These ramps are a medium priority for replacement. There is no timeline set for curb ramp replacement in the table below as it is assumed that ramp replacement will generally occur when the adjacent sidewalk is replaced. See Appendix C for best practices for replacing curb ramps.

**Curb Ramp Cost Estimates**

Curb ramp replacement is usually completed in conjunction with sidewalk replacement. However, in some high priority areas in the city such as Main Street and Federal Street, the sidewalk condition may be adequate, while ramps are missing warning pads for blind and low-vision residents to safely navigate across the street. In these instances, the curb ramp may need to be replaced independently of the sidewalk. In house curb ramp replacement by the City is estimated at $1,500 for each ramp, as such this is not noted in the tables below.

Sidewalk and Ramps by Location

Downtown Sidewalks and Ramps

The Greenfield downtown is the highest use pedestrian area in the city. As such, ADA compliance is a priority in this area to allow the greatest access to civic facilities, as well as goods and services. To help address ADA compliance in this area, BRPC created separate tables for sidewalks and curb ramps in the downtown area.

**Compliance:**
- 1 – No Warning Panel
- 2 – Warning Panel
- 3 – Warning Panel & Poor Condition
Safe Routes to School

Providing safe routes to school for students is one factor that may help guide sidewalk and curb ramp replacement independent of other factors like condition. To help prioritize these needs, BRPC created separate tables of sidewalk and curb ramps within 1000 feet of a school.

On Street Parking

Greenfield has a thriving downtown along Main Street and the adjoining streets. The City has a nightlife and a wide range of activities, shopping, and attractions during the day. As a result, accessible parking is a key component to making sure that Greenfield’s downtown can accommodate everyone.

Key aspects to this challenge to provide accessible parking include having the correct number of handicap accessible on-street parking for cars and vans, meeting all requirements to have an accessible parking space, and ensuring that there is an accessible route from accessible parking to sidewalks.

Actions for having the correct number of spaces include both providing 4% of all on-street parking as accessible and making 1/6 of those a van accessible space. Meeting all requirements for an accessible space include having a standing sign with the handicap symbol on it while also making sure that it meets width requirements and has a proper access isle. Finally, each parking space must have an accessible route to the sidewalk and should not cross vehicle traffic to reach the sidewalk.

Cost Estimate

Using cost estimates from prior projects, the Greenfield DPW estimates that creating a new accessible on street parking space would cost approximately 850.00. This includes the cost for accessible signage, creating an accessible access isle and painting requisite lines on the street. This is assuming that it is placed closer to an accessible ramp onto the sidewalk, but if not, it costs approximately 1,500.00 to replace a cracked or damaged ramp.

Priority and Schedule

The City of Greenfield has an obligation to provide accessible on-street parking. Fixing parking spaces that have an accessible route that requires crossing into vehicle traffic needs to be prioritized to protect the safety of residents. Because many buildings that provide city services are along main street, creating accessible parking is critical to equally providing city services to residents and visitors.

The City has also expressed commitment to redesigning parking throughout downtown to provide better accessibility to essential services and the public right of way.

Appendix A - Grievance Procedure Under the Americans With Disabilities Act

This Grievance Procedure is established to meet the requirements of the Americans with Disabilities Act of 1990 ("ADA"). This may be used by anyone who wishes to file a complaint alleging discrimination on the basis of disability in the provision of services, activities, programs, or benefits by the City of Greenfield.

The City of Greenfield's Personnel Policy governs employment-related complaints of disability discrimination. The complaint should be in writing and contain information about the alleged discrimination such as name, address, phone number of complainant and location, date, and description of the problem. Alternative means of filing complaints, such as personal interviews or a tape recording of the complaint will be made available for persons with disabilities upon request.

The complaint should be submitted by the grievant and/or his/her designee as soon as possible but no later than 60 calendar days after the alleged violation to:

ADA Coordinator  
c/o Office of the Mayor  
City of Greenfield  
Department of Planning & Development  
14 Court Square  
Greenfield, MA 01301  
Email: mayor@greenfield-ma.gov

Within 15 calendar days after receipt of the complaint, ADA Coordinator will meet with the complainant to discuss the complaint and the possible resolutions. Within 15 calendar days of the meeting, the ADA Coordinator will respond in writing, and where appropriate, in a format accessible to the complainant, such as large print, Braille, or audio tape. The response will explain the position of the City of Greenfield and offer options for substantive resolution of the complaint.

If the response by the ADA Coordinator does not satisfactorily resolve the issue, the complainant and/or his/her designee may appeal the decision within 15 calendar days after receipt of the response to the Mayor or his designee.

Within 15 calendar days after receipt of the appeal, the Mayor or his designee will meet with the complainant to discuss the complaint and possible resolutions.

Within 15 calendar days after the meeting, the Mayor or his designee will respond in writing, and, where appropriate, in a format accessible to the complainant, with a final resolution of the complaint.

All written complaints received by ADA Coordinator, appeals to the Mayor or his designee, and responses from these two offices will be retained by the City of Greenfield for at least three years.
Appendix B - Notice of Non-Discrimination

In accordance with the requirements of title II of the Americans with Disabilities Act of 1990 ("ADA"), the City of Greenfield will not discriminate against qualified individuals with disabilities on the basis of disability in its services, programs, or activities.

**Employment**

The City of Greenfield does not discriminate on the basis of disability in its hiring or employment practices and complies with all regulations promulgated by the U.S. Equal Employment Opportunity Commission under title I of the ADA.

**Effective Communication**

The City of Greenfield will generally, upon request, provide appropriate aids and services leading to effective communication for qualified persons with disabilities so they can participate equally in The City of Greenfield programs, services, and activities, including qualified sign language interpreters, documents in Braille, and other ways of making information and communications accessible to people who have speech, hearing, or vision impairments.

**Modifications to Policies and Procedures**

The City of Greenfield will make all reasonable modifications to policies and programs to ensure that people with disabilities have an equal opportunity to enjoy all of its programs, services, and activities. For example, individuals with service animals are welcomed in City of Greenfield offices, even where pets are generally prohibited.

Anyone who requires an auxiliary aid or service for effective communication, or a modification of policies or procedures to participate in a program, service, or activity of City of Greenfield, should contact Maureen Pollock, ADA Coordinator as soon as possible but no later than 48 hours before the scheduled event.

The ADA does not require the City of Greenfield to take any action that would fundamentally alter the nature of its programs or services or impose an undue financial or administrative burden.

Complaints that a program, service, or activity of the City of Greenfield is not accessible to persons with disabilities should be directed to the City’s ADA Coordinator, to be named.

The City of Greenfield will not place a surcharge on a particular individual with a disability or any group of individuals with disabilities to cover the cost of providing auxiliary aids/services or reasonable modifications of policy, such as retrieving items from locations that are open to the public but are not accessible to persons who use wheelchairs.
Appendix C – PROWAG Guidelines for Curbs
Curb Ramps and Blended Transitions

General. There are two types of curb ramps:
Perpendicular curb ramps have a running slope that cuts through or is built up to the curb at right angles or meets the gutter break at right angles where the curb is curved. On large corner radiiuses, it will be necessary to indent the gutter break on one side of the curb ramp in order for the curb ramp to meet the gutter break at right angles. Parallel curb ramps have a running slope that is in-line with the direction of sidewalk travel and lower the sidewalk to a level turning space where a turn is made to enter the pedestrian street crossing.

Perpendicular curb ramps can be provided where the sidewalk is at least 3.7 m (12.0 ft) wide. Parallel curb ramps can be provided where the sidewalk is at least 1.2 m (4.0 ft) wide. Parallel and perpendicular curb ramps can be combined. A parallel curb ramp is used to lower the sidewalk to a mid-landing and a short perpendicular curb ramp connects the landing to the street. Combination curb ramps can be provided where the sidewalk is at least 1.8 m (6.0 ft) wide.

Blended transitions are raised pedestrian street crossings, depressed corners, or similar connections between pedestrian access routes at the level of the sidewalk and the level of the pedestrian street crossing that have a grade of 5 percent or less. Blended transitions are suitable for a range of sidewalk conditions.

Perpendicular Curb Ramps.

Turning Space. A turning space 1.2 m (4.0 ft) minimum by 1.2 m (4.0 ft) minimum shall be provided at the top of the curb ramp and shall be permitted to overlap other turning spaces and clear spaces. Where the turning space is constrained at the back-of-sidewalk, the turning space shall be 1.2 m (4.0 ft) minimum by 1.5 m (5.0 ft) minimum. The 1.5 m (5.0 ft) dimension shall be provided in the direction of the ramp run.

Running Slope. The running slope of the curb ramp shall cut through or shall be built up to the curb at right angles or shall meet the gutter grade break at right angles where the curb is curved. The running slope of the curb ramp shall be 5 percent minimum and 8.3 percent maximum but shall not require the ramp length to exceed 4.5 m (15.0 ft). The running slope of the turning space shall be 2 percent maximum.
Flared Sides. Where a pedestrian circulation path crosses the curb ramp, flared sides shall be sloped 10 percent maximum, measured parallel to the curb line.

Parallel Curb Ramps

Turning Space. A turning space 1.2 m (4.0 ft) minimum by 1.2 m (4.0 ft) minimum shall be provided at the bottom of the curb ramp and shall be permitted to overlap other turning spaces and clear spaces. If the turning space is constrained on 2 or more sides, the turning space shall be 1.2 m (4.0 ft) minimum by 1.5 m (5.0 ft). The 1.5 m (5.0 ft) dimension shall be provided in the direction of the pedestrian street crossing.

Running Slope. The running slope of the curb ramp shall be in-line with the direction of sidewalk travel. The running slope of the curb ramp shall be 5 percent minimum and 8.3 percent maximum but shall not require the ramp length to exceed 4.5 m (15.0 ft) minimum. The running slope of the turning space shall be 2 percent maximum.
Blended Transitions

Running Slope. The running slope of blended transitions shall be 5 percent maximum.

Common Requirements.

Grade Breaks. Grade breaks at the top and bottom of curb ramp runs shall be perpendicular to the direction of the ramp run. Grade breaks shall not be permitted on the surface of ramp runs and turning spaces. Surface slopes that meet at grade breaks shall be flush.

Width. The clear width of curb ramp runs (excluding any flared sides), blended transitions, and turning spaces shall be 1.2 m (4.0 ft) minimum.

Cross Slope. The cross slope of curb ramps, blended transitions, and turning spaces shall be 2 percent maximum. At pedestrian street crossings without yield or stop control and at midblock pedestrian street crossings, the cross slope shall be permitted to equal the street or highway grade.

Counter Slope. The counter slope of the gutter or street at the foot of curb ramp runs, blended transitions, and turning spaces shall be 5 percent maximum.
**Clear Space.** Beyond the bottom grade break, a clear space 1.2 m (4.0 ft) minimum by 1.2 m (4.0 ft) minimum shall be provided within the width of the pedestrian street crossing and wholly outside the parallel vehicle travel lane.

**Detectable Warning Surfaces**

**General.** Detectable warning surfaces shall consist of truncated domes aligned in a square or radial grid pattern and shall comply with R305.

**R305.1.1 Dome Size.** The truncated domes shall have a base diameter of 23 mm (0.9 in) minimum and 36 mm (1.4 in) maximum, a top diameter of 50 percent of the base diameter minimum and 65 percent of the base diameter maximum, and a height of 5 mm (0.2 in).

**R305.1.2 Dome Spacing.** The truncated domes shall have a center-to-center spacing of 41 mm (1.6 in) minimum and 61 mm (2.4 in) maximum, and a base-to-base spacing of 17 mm (0.65 in) minimum, measured between the most adjacent domes.

**Contrast.** Detectable warning surfaces shall contrast visually with adjacent gutter, street or highway, or pedestrian access route surface, either light-on-dark or dark-on-light. **Size.** Detectable warning surfaces shall extend 610 mm (2.0 ft) minimum in the direction of pedestrian travel. At curb ramps and blended transitions, detectable warning surfaces shall extend the full width of the ramp run (excluding any flared sides), blended transition, or turning space. At pedestrian at-grade rail crossings not located within a street or highway, detectable warnings shall extend the full width of
the crossing. At boarding platforms for buses and rail vehicles, detectable warning surfaces shall extend the full length of the public use areas of the platform. At boarding and alighting areas at sidewalk or street level transit stops for rail vehicles, detectable warning surfaces shall extend the full length of the transit stop.

**Placement**

**Perpendicular Curb Ramps.** On perpendicular curb ramps, detectable warning surfaces shall be placed as follows:
- Where the ends of the bottom grade break are in front of the back of curb, detectable warning surfaces shall be placed at the back of curb.
- Where the ends of the bottom grade break are behind the back of curb and the distance from either end of the bottom grade brake to the back of curb is 1.5 m (5.0 ft) or less, detectable warning surfaces shall be placed on the ramp run within one dome spacing of the bottom grade break.
- Where the ends of the bottom grade break are behind the back of curb and the distance from either end of the bottom grade brake to the back of curb is more than 1.5 m (5.0 ft), detectable warning surfaces shall be placed on the lower landing at the back of curb.
**Parallel Curb Ramps.** On parallel curb ramps, detectable warning surfaces shall be placed on the turning space at the flush transition between the street and sidewalk.

**Blended Transitions.** On blended transitions, detectable warning surfaces shall be placed at the back of curb. Where raised pedestrian street crossings, depressed corners, or other level pedestrian street crossings are provided, detectable warning surfaces shall be placed at the flush transition between the street and the sidewalk.

**Pedestrian Refuge Islands.** At cut-through pedestrian refuge islands, detectable warning surfaces shall be placed at the edges of the pedestrian island and shall be separated by a 610 mm (2.0 ft) minimum length of surface without detectable warnings.
