

Point Paper #13 Wisdom Way

This project is a high priority. We have it TIP approved but not yet on the TIP. It seems to be next in line. We have the Engineering Firm of Fuss and O'Neil working on the design. Currently we have the 25% design being evaluated by Mass Highway. The next step will be the utility meeting which could happen as early as August and then a Public Hearing which I think will be scheduled in September or October. Once the public meeting is complete we need to issue an amendment to Fuss and O'Neil contract to have them complete the design. I believe we were quoted \$79,000. Once we get 25% approved then someone will have to start on the easement and Right of Entries. Karen Axtell tel # 413 582 0550 Mass Highway can help.

The POC for the City of Greenfield will be Nick Reitzel. The POC for Fuss and O'Neil is Nick Lapointe. His e-mail address is NLapointe@fando.com and his Tel # is 413 452 0445 ext 4425.
