

## ***Sustainable Greenfield* Transportation Chapter Update**

I obviously focused on the “Implementation Actions” column, creating -- to the best of my current knowledge -- a “Status” update specific to that action in the adjacent column. I also have suggested “Lead Department or Stakeholder” changes in the column on the far right of the spreadsheet. This is obviously a large document, but focusing on only those three columns will hopefully make it feasible to do an efficient, relatively quick scan.

The updates are all bolded. For the suggested changes of Leads, I did a ~~striketrough~~ if my sense was they didn’t fit that specific implementation action, and **bolded** where I added seemingly relevant Leads that were not listed in the original *Sustainable Greenfield* document.

I had also hoped to customize the estimated cost and timeframe columns for each implementation action, but at this point the format won’t allow it, plus I (obviously) ran short on time.

I have tried to put a “?” wherever I had a significant degree of uncertainty -- I would be particularly interested in getting committee feedback on those items. Of course, *all* of my updates and suggested Lead changes are subject to committee input/agreement/change.

I found this exercise very helpful in providing a fine-tuned examination of the individual implementation actions in the plan, both from the point of view of assessing progress to-date and as an opportunity to better determine who to collaborate with to move the item forward.

respectfully submitted,  
George Touloumtzis
